## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group (A)**, claim(s) 1-10, drawn to a method for treating a neurological condition characterized by dysfunction of nicotinic acetylcholine receptors comprising co-administering metanicotine and at least one compound exhibiting antagonistic activity, or both agonist and antagonist activity, toward one or more nicotinic acetylcholine receptor subtypes.

**Group (B)**, claim(s) 11-12, a pharmaceutical composition comprising metanicotine and at least one compound exhibiting antagonistic activity, or both agonist and antagonist activity, toward one or more nicotinic acetylcholine receptor subtypes.

**Group (B)**, claim(s) 13-20, a method for modulating the activity of a compound exhibiting antagonistic activity, or both agonist and antagonist activity, toward one or more nicotinic acetylcholine receptor subtypes, comprising contacting the compound with metanicotine.

The inventions listed as Groups A-C do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature linking groups A-C appears to

Art Unit: 1614

that they all relate to a combination of metanicotine and a nAChR antagonist or mixed nAChR agonist/antagonist. However, the claimed combination, namely metanicotine and mecamlamine, is known in the art (Damaj et al., The Journal of Pharmacology and Experimental therapeutics, 1999, 291:390-398). Therefore, the technical feature linking the inventions of groups A-C does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art. Accordingly, Groups A-C are not linked by the same or a corresponding special technical feature as to form a single general inventive concept.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Kwon whose telephone number is (703)308-5377. The examiner can normally be reached Tuesday through Friday from 9:00 am to 7:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marianne Seidel, can be reached on (703) 308-4725. The fax number for this Group is (703) 308-4556.

Any inquiry of a general nature of relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1235.
